

Biogeography. Lecture 14

Alexey Shipunov

Minot State University

March 3, 2014

Outline

Taxonomy

Basic principles

Taxonomy

Basic principles

Synonyms, homonyms and hemihomonyms

- ▶ **Synonyms** are older names, we can use it but it is better to avoid them
- ▶ **Homonyms** are same names for different taxa, we must eliminate them
- ▶ **Hemihomonyms** are “legal homonyms”, same names under different codes of nomenclature, e.g. *Oenanthe* (bird) and *Oenanthe* (plant).
