

Introduction to Botany: BIOL 154

Lab 2. Plant morphology: trees on campus

Alexey Shipunov

September 12th, 2010

Preparation/reading:

- Review both keys, read the intro to the first key
- Understand the principles of identification
- Read dictionaries of both keys
- Go to the designated place
- Start with first tree, determine it, list most important characters
- The same with second and third tree
- Map location of trees, list Latin names on map
